ONTARIO AGRA PIPING & SUPPLIES INC.

GROUND PROTECTION MATS

- 100% Recyclable
- Standard thickness 12.7mm (½") Supports 60 metric tons of uniformed distributed loads
- 1.2m x 2.4m (aprox. 4' x 8' standard size)
- Diamond tread surface provides exceptional grip
- Available steel clips to lock mats together

Construction Mud Mats are designed to allow your heavy vehicles or machinery to drive on muddy, swampy, and soft ground without getting stuck. They will also greatly reduce damage and compaction to the ground. The product is made from not more than 10% recycled high density polyethylene for unsurpassed quality and durability.

This flexible system conforms to uneven ground conditions and protects project area from damage caused from heavy equipment.
