

Stay grounded with GridX – the eco-friendly system of permeable paving grids made from 100% post-consumer recycled plastic.

As a natural alternative to asphalt or concrete, GridX is perfect for parking lots, driveways and animal paddocks. The porous grids stabilize the soil – eliminating potholes, ruts and mud – and allow water to permeate the ground, creating a flexible and durable surface for vehicles and pedestrians.

A Green Solution

The porous GridX webstructure supports Low Impact Development by allowing rain and stormwater to saturate the ground evenly, improving earth retention, slope protection and groundwater recharge.

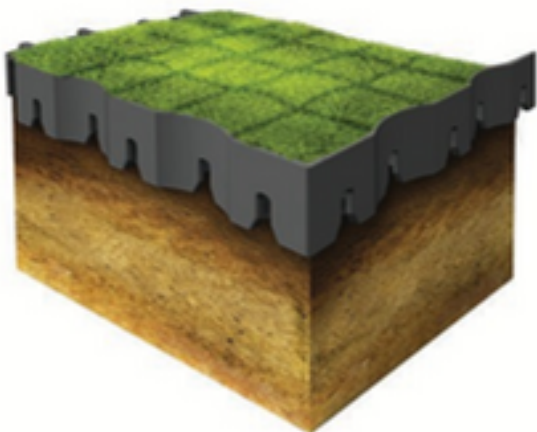

Lock into Strength

The strong interlocking grid can be filled with soil, gravel, grass, or paving stones to improve grid strength and withstand heavy traffic, including construction equipment, snowplows, lawnmowers, trucks and other utility vehicles.

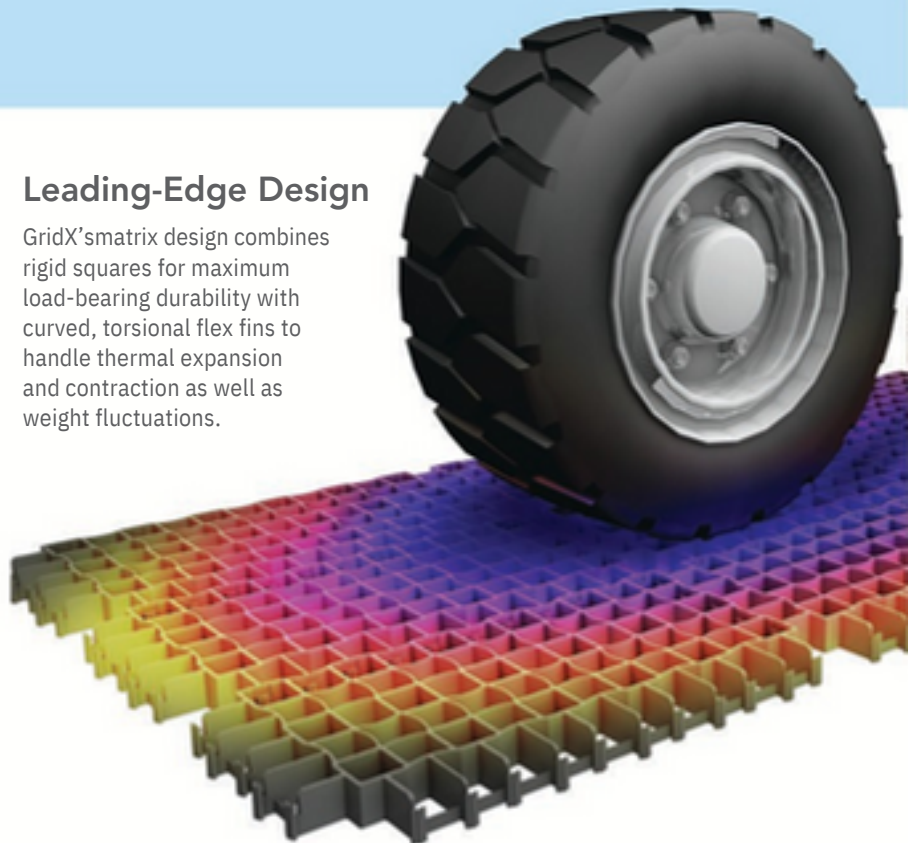

A Natural Fit

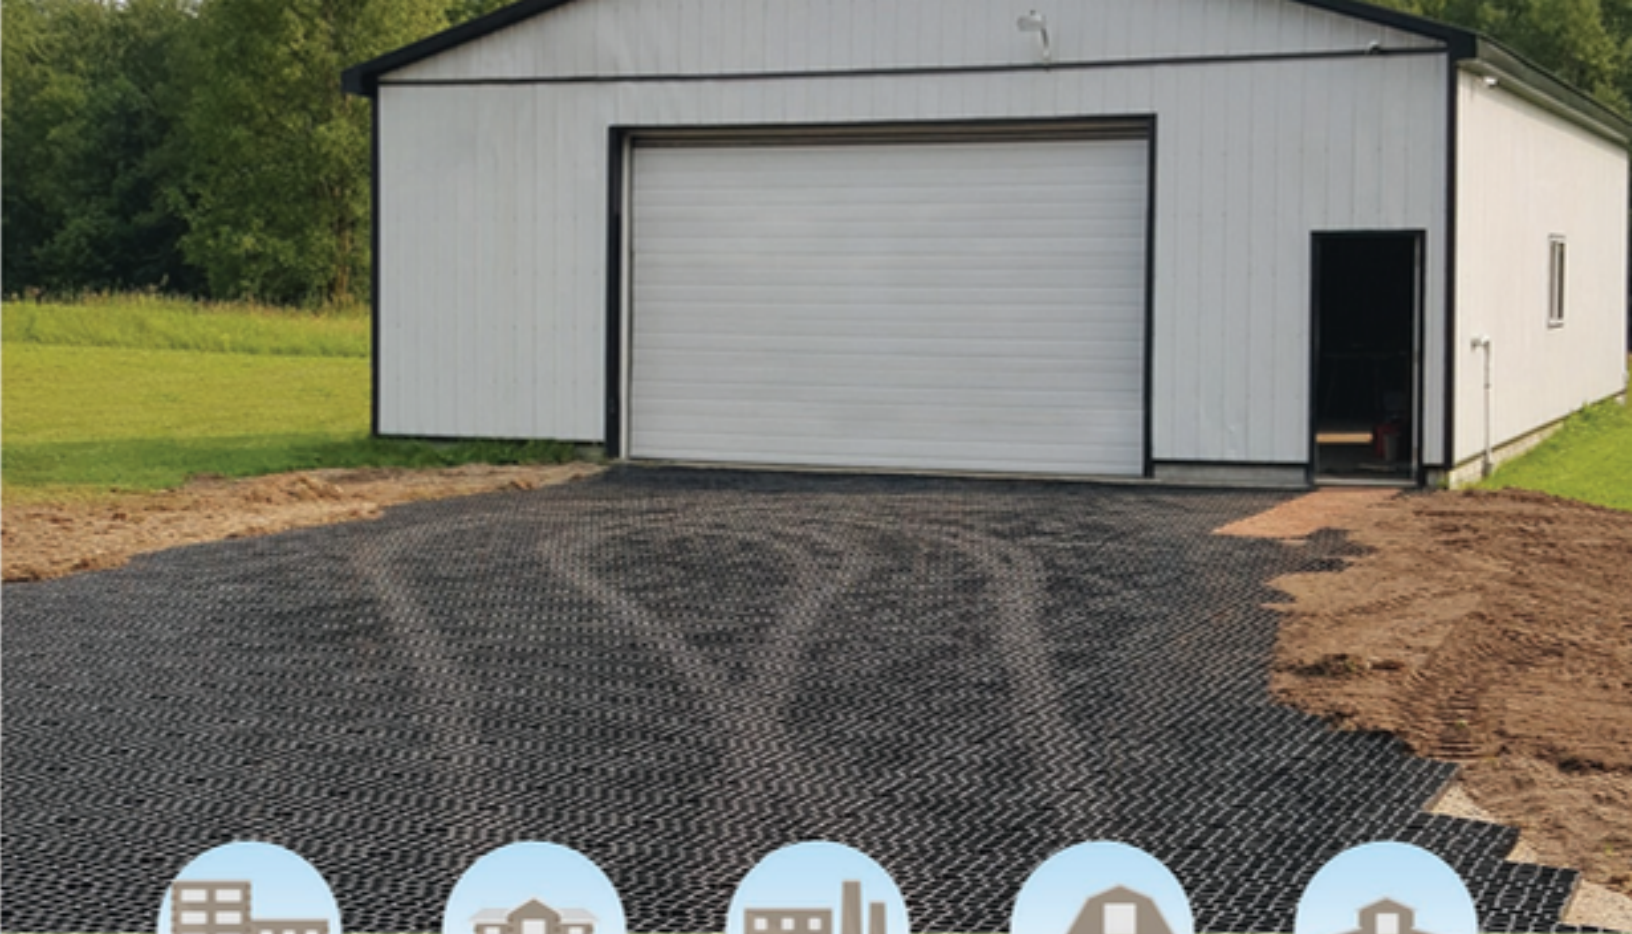

Manufactured from 100% post-consumer recycled (PCR) plastic, GridX is an environmentally-friendly resin product that leaves behind a significantly smaller ecological footprint than other paving methods.

Leading-Edge Design

GridX's matrix design combines rigid squares for maximum load-bearing durability with curved, torsional flex fins to handle thermal expansion and contraction as well as weight fluctuations.

COMMERCIAL

RESIDENTIAL

INDUSTRIAL

AGRICULTURAL

EQUESTRIAN

GridX offers exceptional versatility for a wide range of environmentally-friendly paving applications.

Roads and Driveways ▶

GridX is ideal for cost-effective and fast construction of access routes for industrial and commercial buildings, fire lanes, emergency routes and remote areas.

◀ Parking Lots

Break new ground with a permeable parking lot that is easy to install and maintain. Optional 12" x 12" porous paver stones can be set into the Double Stone Parking Grid for 8 foot parking space line markers.

Animal Paddocks ▶

Solve the problem of messy farm yards, paddocks and equestrian arenas with a reliable, well-drained surface. GridX panels drain evenly and hold soil in place, creating a safe and clean environment for you and your animals – without the worry of falls from muddy, slippery surfaces.

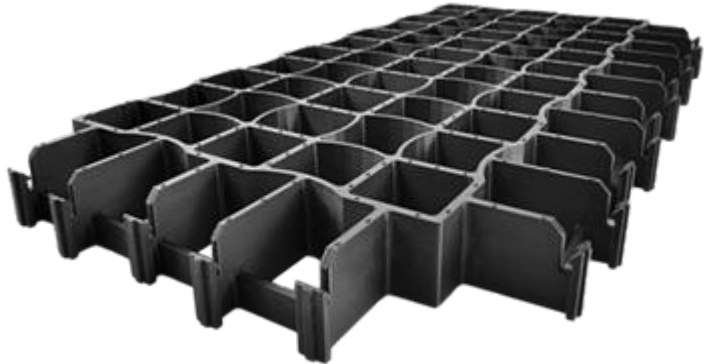

GridX G50 Parking Grid

As a natural alternative to asphalt or concrete, GridX is perfect for parking lots, driveways, high traffic walkways, animal paddocks and many other applications.

The porous grid stabilizes ground material – eliminating potholes, ruts and mud – and allows water to permeate the ground, creating a flexible and durable surface for vehicles, pedestrians and livestock.

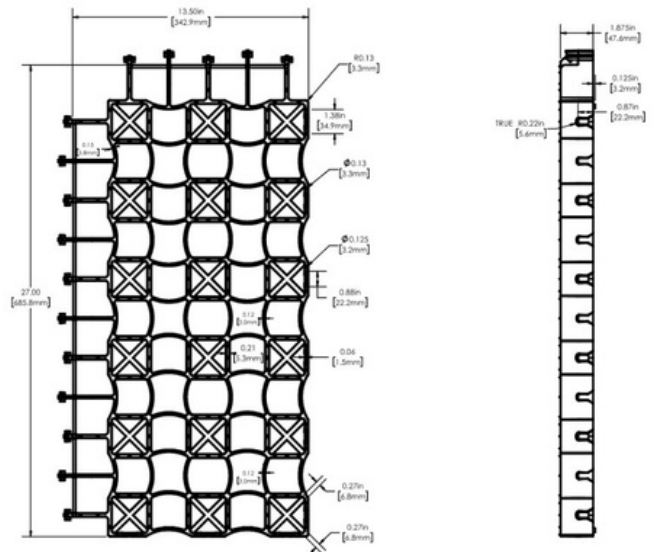

**SUSTAINABLE INNOVATION,
OUTSTANDING VERSATILITY**

Stay grounded with GridX – the eco-friendly system of permeable paving grids made from 100% post-consumer recycled plastic.

Grid Specifications

Dimensions	432 mm (13.5") x 686 mm (27") x 47mm (1.875")
Coverage Area	0.235 m2 (2.53 sq ft)
Weight	1.78 kg (3.9 lbs)
Loading	807 ton/m2 (165,000 lbs/sq ft) Depending on Fill Type
Wall Thickness	Variable Up to 6.4 mm (0.2519")
Climate	-40oC to +40 oC (-40 oF to 104 oF)
Interlock	54 Locking Notch Connections / m2
Maintenance	None, Snowplow/Blower Ready
Material	100% Post Consumer Recycled Plastic
Colour	Black

Standard Packaging Details

Box Order

1 Box / 8 pcs 1.86 m2	40.64 cm x 73.66 cm x 40.64 cm – 16.3 kg
1 Box / 8 pcs 20 sq ft	16" W x 29" L x 16" H – 36 lbs

Pallet Order

1 Pallet / 240 pcs / 56.21 m2	1.22 m x 1.42 m x 2.01 m – 436 kgs
1 Pallet / 240 pcs / 605 sq ft	48" W x 56" L x 79" H – 960 lbs

Mutli Pallet 53ft Truckload Order

21 Pallets / 5,040 pcs / 1180 m2	8,916 kgs
21 Pallets / 5,040 pcs / 12,700 sq ft	19,656 lbs

GridX Permeable G50 Double Stone Grid

As a natural alternative to asphalt or concrete, GridX is perfect for parking lots, driveways, high traffic walkways, and many other applications.

The double stone parking grid stabilizes base ground material and provides a perfectly aligned installation base for 12" x 12" x 1.5" paving stones.
